DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 2-9,34-41, drawn to a method and apparatus for voice/unvoiced decisions with respect to pitch, classified in class 704, subclass 208.
 - II. Claims 10-17,42-46, drawn to a method and apparatus performing vector quantization, classified in class 704, subclass 222.
 - III. Claims 18-26, drawn to an apparatus for excitation patterns, classified in class 704, subclass 223.
 - IV. Claims 27-33,47-51, drawn to an apparatus and method for bit allocation, classified in class 704, subclass 229.

The inventions are distinct, each from the other because of the following reasons:

2. Anyone of inventions I,II,III, IV and any one of the remaining inventions I,II,III,IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, any one of inventions I,II,III,IV has separate utility such as not with any one of the remaining inventions rather with either one of the remaining two inventions, e.g., the method/apparatus for voice/unvoiced decisions can be used with the apparatus for excitation

patterns or bit allocating, rather than with the apparatus performing vector quantization. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Farjami on 6/15/2004 to notify the applicant about the restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
